PASSENGER VESSELS

DUAL FUNCTION LADDER & HORIZONTAL LIFT

Access Net Sizing
& Model Guidance

A trusted global leader for decades with a loyal, world-wide customer base

Cost-Effective

More cost-effective than any other comparative product on the market

Lightweight & Easy to Use

Easily deployable and transportable by one person, without requiring a mechanical device

Full Body Support

Allows for safe and comfortable horizontal MOB recovery, reducing the risk of injury and post-rescue collapse in cold water rescues

Multi-Use

Markus can be flexibly used as a ladder and a medically approved horizontal/parbuckle lifting device for different rescue scenarios

Portable and Compact

Flexibly stowed by one person and take up 50% less space than other nets

About Us

Marine Rescue Technologies was born from a singular mission: to safeguard lives at sea. We've become a leading provider of marine safety equipment, offering a wide range of marine rescue products and marine technology solutions.

From innovative technology to essential rescue nets and evacuation aids, we equip vessels of all sizes for any emergency.
