

# **MarkusNet MS Series**

**Designed for Deck  
Boats, Cargo Ships,  
Offshore Platforms,  
Piers, Dams, Ports,  
Canal Walls and  
more.**

## **MS.05 - MS.40**

**Available in sizes to fit freeboards from 2 meters to 40 meters**

**SOLAS Approved for all vessel types**

# MarkusNet MS Series

## Methods of Use

- MULTIPLE-RECOVERY POSITIONS:** Allows recovery in standing, sitting, or horizontal-assisted positions, minimizing stress and injury risk.
- FAR-REACHING RESCUE:** Includes a weighted 25-meter throw line and lifting lines (up to 40 meters), enabling secure in-water rescues for large ships with limited maneuverability.
- HORIZONTAL RESCUE:** Medically approved and comfortable recovery, reducing the risk of injury and post-rescue collapse in cold water rescues.

**SOLAS-approved for rescues on high-sided vessels.**

## Leading Solution

**SOLAS APPROVED**  
For guaranteed compliance

**25 M THROW LINE**  
Chest loop for in-water rescue

**EQUIPPED WITH LIFT LINES**  
Up to 40 meters

**WORKLOAD**  
500 kg or 0.5 MT

**LOAD CAPACITY**  
1 person

**HIGH-STRENGTH POLYESTER**  
Webbing

**DURABLE AND LONG-LASTING**  
Marine-grade plastic & metal components

**FIBERGLASS CONTAINER**  
For mounting on ship's side

**5-YEAR WARRANTY**

**NO ANNUAL SERVICE**  
Requirement

# Dimensions & Models

**Weight:** Net weight is approximately 4 kg (varies with model and lift line length)

**Rigid Container Dimensions:**  
70cm x 50cm x 20cm  
(standard model)

The MS.05, MS.10, MS.20, and MS.30 have **lifting lines of equal lengths** on the inner and outer ends of net structure

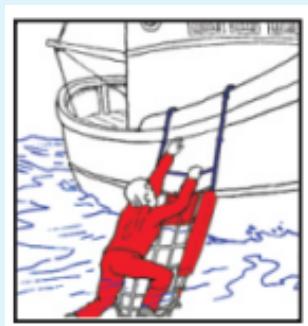

**MS.05** for Marine Safety, survival training centers and vessels with up to 5m lifting height.

**MS.10** for vessels with up to 10 m lifting height

**MS.20** for vessels with up to 20 m lifting height

**MS.30** for vessels with up to 30 m lifting height

**MS.40** for vessels with up to 40 m lifting height

## Lightweight & Easy to Use

Easily deployable by one to two persons, either manually or using a short boom and winch

## Portable and Compact

Flexibly stowed in a red compact fiberglass container, ideal for vessels with limited space or high mobility needs

## Durable & Long-lasting

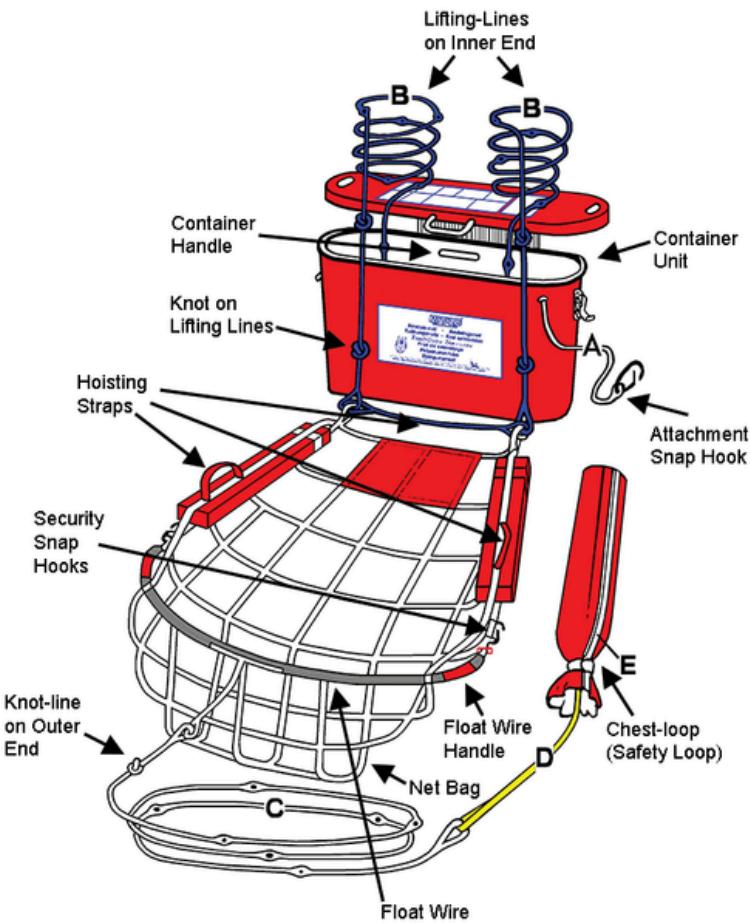

All nets are built for harsh marine environments, including commercial, SAR and military applications

## Meets Compliance

Guaranteed compliance with local and international standards including SOLAS certification for MS.05, MS.10, MS.20 and MS.30

## Cost-Effective

More cost-effective than any other comparable product on the market.

## WIDELY USED BY

DECK BOATS  
CARGO SHIPS  
OFFSHORE  
PLATFORMS

PIERS, DAMS, CANAL  
WALLS  
PORTS  
MILITARY VESSELS
