

Underwater Inspection Camera

USES AND APPLICATIONS

Reach and Rescue's Underwater Inspection Camera is for use when an underwater search is required. It features a bright LED torch to illuminate murky waters, utilizes a powerful, rechargeable Lithium Ion Battery and displays its findings via a clear 7" TFT display.

HOW TO USE

The sleeve fitting is designed to slide over the pole top fitting, which secures it in place using a double sprung button mechanism.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting, as damage will prevent the attachment from fitting securely.

Used by...

UK Fire & Rescue Services

Dorset Marine Police
used the Reach and Rescue Underwater Inspection Camera to search for a missing person

Kent Police
(recently used the Reach and Rescue Underwater Inspection Camera to locate a murder weapon)
